

INFLATION

2020-2025 Will Change Your Life Forever!

David Ford

"Lenin is said to have declared that the best way to destroy the Capitalist System was to debauch the currency. **By a continuing process of inflation, Governments can confiscate, secretly and unobserved,** an important part of the wealth of their citizens. By this method they not only confiscate, but they confiscate arbitrarily; and, while the process impoverishes many, it actually enriches some . . . Lenin was certainly right. There is no subtler, no surer means of overturning the existing basis of society than to **debauch the currency.** The process engages all the hidden forces of economic law on the side of destruction, and **does it in a manner which not one man in a million is able to diagnose.**"

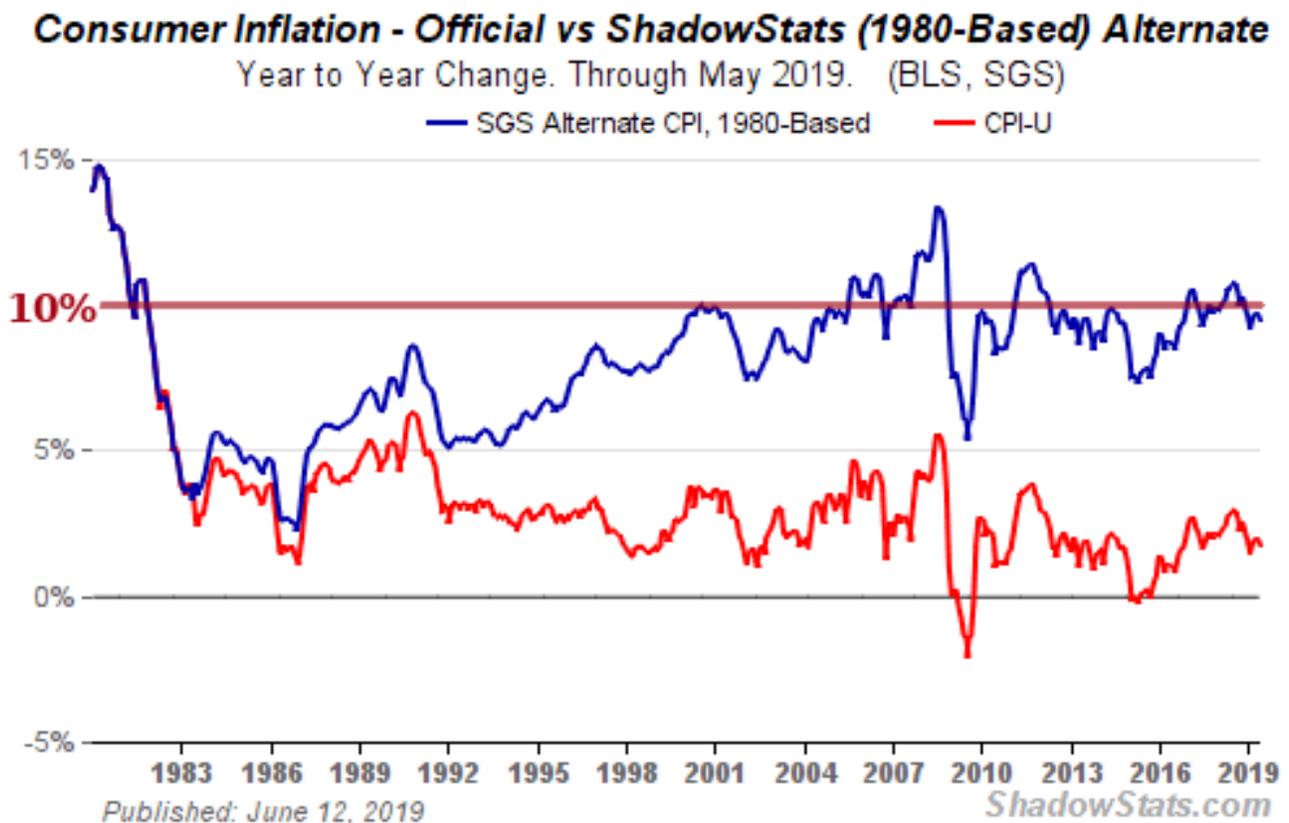

— John Maynard Keynes, 1921, [The Economic Consequences of the Peace](#)

The Devaluation of the Dollar will Dramatically Affect Your Life within the Next Five Years!

The Consumer Price Index was originally designed to be a measure of the cost of living needed to maintain a constant standard of living. However, in 1983 the US government started manipulating the way consumer inflation was calculated. Since then, the government has been artificially deflating the CPI to keep figures as low as possible.

The pre-defined, consistently weighted basket of goods used to measure inflation, has now grown to an unreasonable 80,000+ items. This has allowed government accountants to replace items that have increased in price with other, less expensive, “similar” items that actually don’t represent the same standard of living. So, if you have been wondering why it is harder to make ends meet and your money doesn’t go as far as it did before – look at the true inflation rate!

Don't believe the lies that there is no inflation! **Inflation has averaged 10% annually for the last 19 years!** Take a look at John Williams’ ShadowStats calculation of the REAL cost of living increase using the original pre-1983 accounting methods!

Source: [ShadowStats Inflation chart](#)

The Chapwood Index publishes a measure of the actual price increase of the 500 items on which most Americans spend their after-tax money. No gimmicks, no alterations, no seasonal adjustments; just real prices.

Ed Butowsky began calculating the Chapwood Index in 2008. Using social media, he surveyed his friends across the country to determine what they bought with their after-tax income. He narrowed the list down to the most frequent 500 items and asked his friends in America’s 50 largest cities to check the prices on those items periodically. **The Index shows the fluctuation in each city in the cost of items such as:**

Starbucks coffee, Advil, insurance, gasoline, sales and income taxes, tolls, fast food restaurants, toothpaste, oil changes, car washes, pizza, cable TV and Internet service, cellphone service, dry cleaning, movie tickets, cosmetics, gym memberships, home repairs, piano lessons, laundry detergent, light bulbs, school supplies, parking meters, pet food, underwear and People magazine.

The Index forces middle-class Americans to recognize that their dependence on income increases pegged to the much-lower CPI **virtually guarantees that they will run out of money before they die**, because people are living longer and there is a **huge difference between the CPI and the real world**.

Interestingly, the Chapwood Index shows that we have a true inflation rate between 8 to 13 percent – averaging about 10 percent!

City	↕	CY 2014 ↕	CY 2015 ↕	CY 2016 ↕	CY 2017 ↕	CY 2018 ↕	5yr Avg ↕
1. New York		12.4%	10.3%	10.8%	11.2%	12.6%	11.5%
2. Los Angeles		12.1%	10.9%	11.1%	11.6%	12.1%	11.6%
3. Chicago		10.9%	9.8%	10.9%	11.0%	11.9%	10.9%

Ten Percent Inflation for 19 Years has Totally Destroyed the Middle-class!

If you don't consistently earn ten percent extra income each year – then you are falling behind.

How far behind? You will be very surprised! In 2000, the minimum wage was \$5.15 – today it is \$7.25. If we use the assumed 2 % target inflation rate (i.e. theft rate) that the Federal Reserve says they strive to maintain, the current minimum wage should be \$7.51.

However, now that we know the real inflation rate is around ten percent, what do you think our minimum wage should be today? **It calculates to a whopping \$31.57!** Yes, this number is correct! You can now see how inflation destroys your purchasing power while your wages NEVER keep up with it.

So, we are now excited to get a \$30 an hour job, not realizing that we are actually able to purchase even less than what we did back in 2000 making \$5.15! The middle-class is now working for minimum wage rates!

And on top of it all, the Federal Reserve has been creating more US dollars out of thin air than they tell us. With Quantitative Easing and near-zero percent interest rates, more and more US dollars are borrowed into existence, creating incredibly large bubbles and stoking the inflation fires even more.

Inflation is a runaway train that will not stop. How bad can it get? Consider Zimbabwe's "[official](#)" yearly inflation rate of **11,250,000%** as of June, 2008, which was estimated to actually be **30 million percent!**

Zimbabwe finally printed what probably was the largest note in world history – a 100 Trillion Dollar Note – **worth about \$5 US Dollars!**

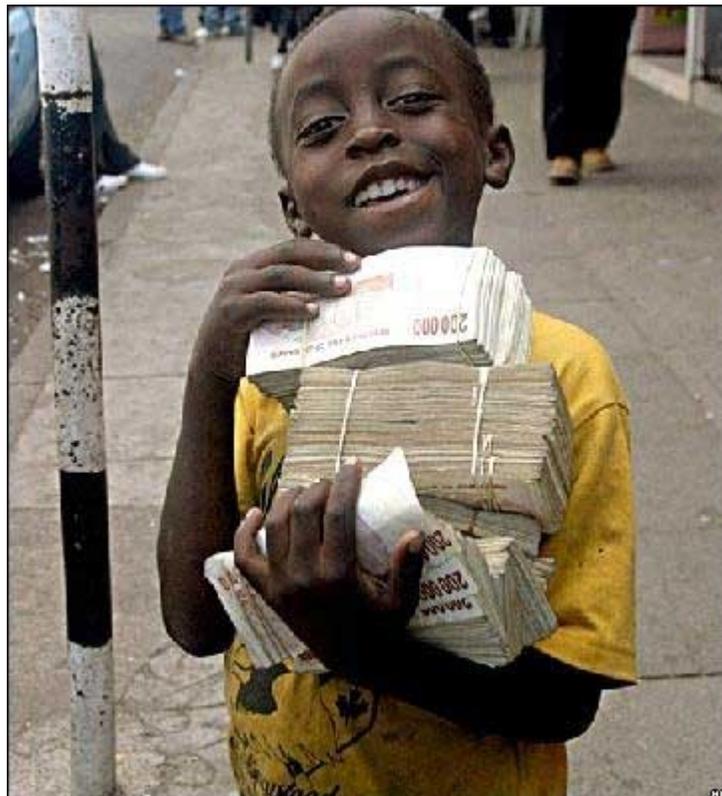

*You can now [purchase](#) this uncirculated note for \$65.

Eating Out Requires a LOT of Hyper-Inflated Currency!

Young Kid already a BILLIONAIRE

The US Dollar has Lost 80% Since 2000

Take a look at this [chart](#) published by Egon von Greyerz of [Matterhorn Asset Management AG](#). Using Gold as a benchmark, the US Dollar has lost 80% of its value since 2000. Additionally, it has lost 98% of its value since [President Nixon](#) took the USA off of the gold standard in 1971. It is easy to see that all fiat currencies eventually reach their intrinsic value of ZERO!

THE CURRENCY RACE TO THE BOTTOM

GOLD PER OZ	1971	2000	2019	DROP IN CURRENCY 2000-2019	DROP IN CURRENCY 1971-2019
USA	USD 35	USD 288	USD 1440	80%	98%
UK	GBP 15	GBP 177	GBP 1186	85%	99%
GERMANY/EU-EZ	EUR 65	EUR 286	EUR 1297	78%	95%
SWITZERLAND	CHF 148	CHF 458	CHF 1414	68%	90%
SWEDEN	SEK 182	SEK 2448	SEK 13900	82%	99%
CANADA	CAD 35	CAD 417	CAD 1901	78%	98%
AUSTRALIA	AUD 31	AUD 438	AUD 2121	79%	99%
JAPAN	JPY 12K	JPY 31K	JPY 153K	80%	92%
ARGENTINA		ARS 288	ARS 64M	99.99%	
VENEZUELA		VEF 180	VEF 357M	99.99%	GoldSwitzerland

*Actually, since the gold price is manipulated downward via paper ETF derivatives (GLD and SLV), the true drop in the world fiat currencies is much greater – maybe even by a factor of 10X or more!

If you had purchased one ounce of gold in 1971 for \$35, you would still have the same purchasing power today at gold's \$1500 per ounce. The sad fact is that if you held on to your \$35 in cash, today you would have the purchasing power of **70 cents!** This is how inflation destroys and discourages savings. If you don't spend your money now, you will have nothing to spend later!

"And I sincerely believe with you, that **banking establishments are more dangerous than standing armies**; & that the principle of spending money to be paid by posterity, under the name of funding, is but swindling futurity on a large scale."

– Thomas Jefferson [to John Taylor](#), May 28, 1816, in [PTJ:RS](#), 10:89.

Consider this excerpt from a recent article by [Sovereignman](#) which addresses the true inflation rate.

In 1962 in a picturesque setting in Santa Barbara, California, two local entrepreneurs opened a low-cost, roadside inn where **the nightly room rate was just \$6**. They called it Motel 6. And today the chain has grown to over 1,400 locations.

If you want the most straightforward explanation for why you should own gold, consider your local Motel 6. **It's noteworthy that, today, the very same Santa Barbara location now rents its rooms for nearly \$90 per night.**

That's a 15x increase in 57 years, an average increase of roughly 5% per year.

. . . Unlike paper currencies, gold has a 5,000 year track record of keeping up with inflation. In fact, when priced in gold, a room at the Motel 6 has actually gotten cheaper.

Back in 1962, an ounce of gold would buy you about 6 nights at the motel. Now, despite the 12-fold increase in the price of a room, one ounce of gold will buy you 21 nights there.

That's because the price of gold has largely outpaced the rate of inflation and the decline in the purchasing power of the US dollar. Gold is a fantastic long-term store of value. It's also an insurance policy-- a hedge against paper currency, systemic risk, and uncertainty.

Note: If you had put that \$35 into a savings account instead of buying an ounce of gold in 1962, you would now have enough money **for only one-third of a night's stay** at Motel 6! **You got 63 times more value by investing in gold instead of a savings account!**

Gold and Bitcoin

Let's look at the inflation rate for the first half of 2019. If, in January, you had converted your US dollars to Bitcoin or Gold – by August – **you would have been much better off!**

Gold is up 17% against the dollar.

Bitcoin is up 170% against the dollar.

Source: [News from the Vault](#)

Since January, your US Dollars have lost 15% against gold and a whopping 99% against Bitcoin!

This is an incredible amount of inflation in just eight months.

Inflation is at 15% – if we use Gold as our measure

Inflation is at 99% – if we use Bitcoin as our measure

This data shows that the structures that have been artificially holding down the price of gold are not working anymore. How much has the true price of gold been restrained? **If we look at Bitcoin, which is much harder to control, we may have a better indicator of the true price of gold – if it was not manipulated, as well as the true inflation rate! Of course this also shows us what is probably the TRUE value of all the US Dollars that have been printed out of thin air – almost NOTHING!**

The US dollar is only supported by consumer confidence and the US military. Both, the confidence and the military hegemony appear to be waning. At some point in the near future the balance will tip in favor of an honest form of preserving wealth.

UK Central Bank Chief Sees Digital Currency Displacing US Dollar as Global Reserve August 23, 2019

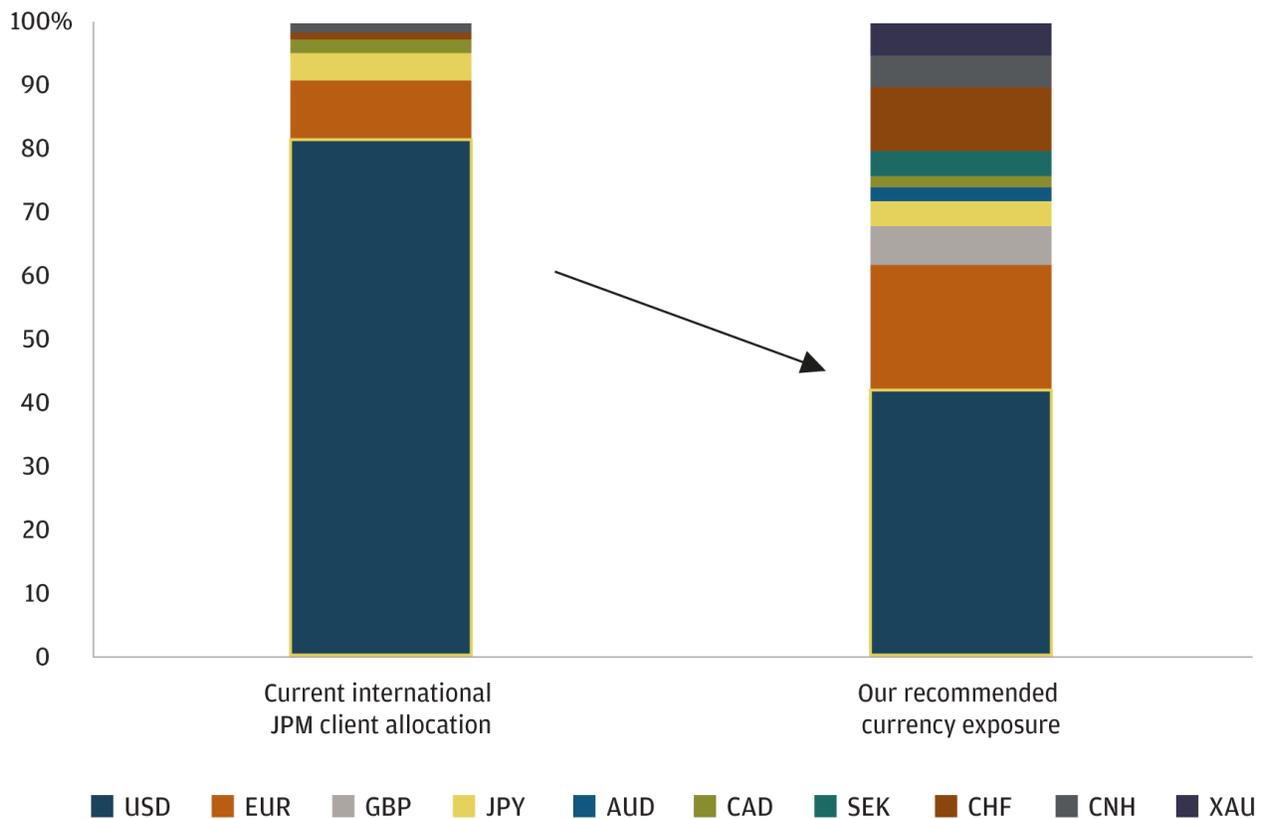

Banks are Now Advising their Clients to De-Dollarize

Is the dollar's "exorbitant privilege" coming to an end? July 25, 2019

This JP Morgan report shows that central banks' USD holdings have declined by two percent in the last year to 55 percent.

The JP Morgan report advises its clients to:

1. Cut their Dollar (USD) holdings in half – from 80 to 40 percent
2. Double their holdings of Swiss Francs (CHF) – from 8 to 16 percent
3. Increase their Gold (XAU) supply by five times – from 1 to 5 percent.

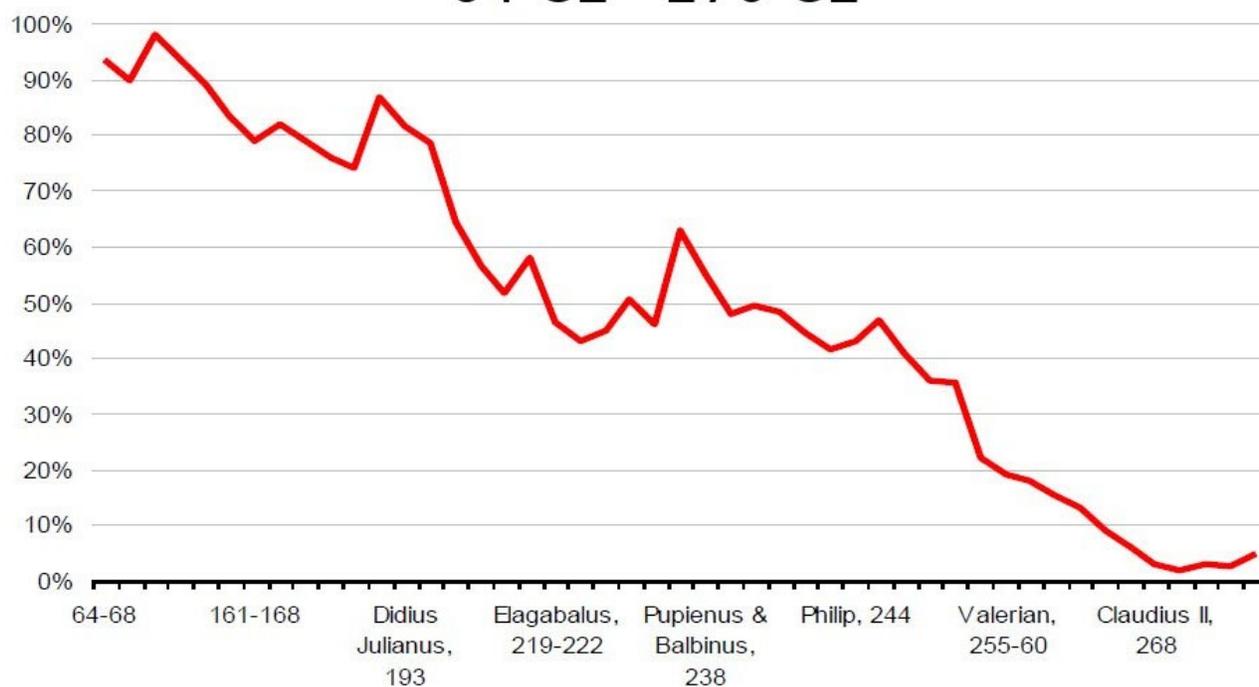

Source: [JP Morgan](#)

Perpetual Inflation

Governments always seem to devalue their currency by inflation. The first record of inflation in world history was the Roman empire's debasement of their silver Denarius.

Silver Content of the Roman Denarius 64 CE - 270 CE

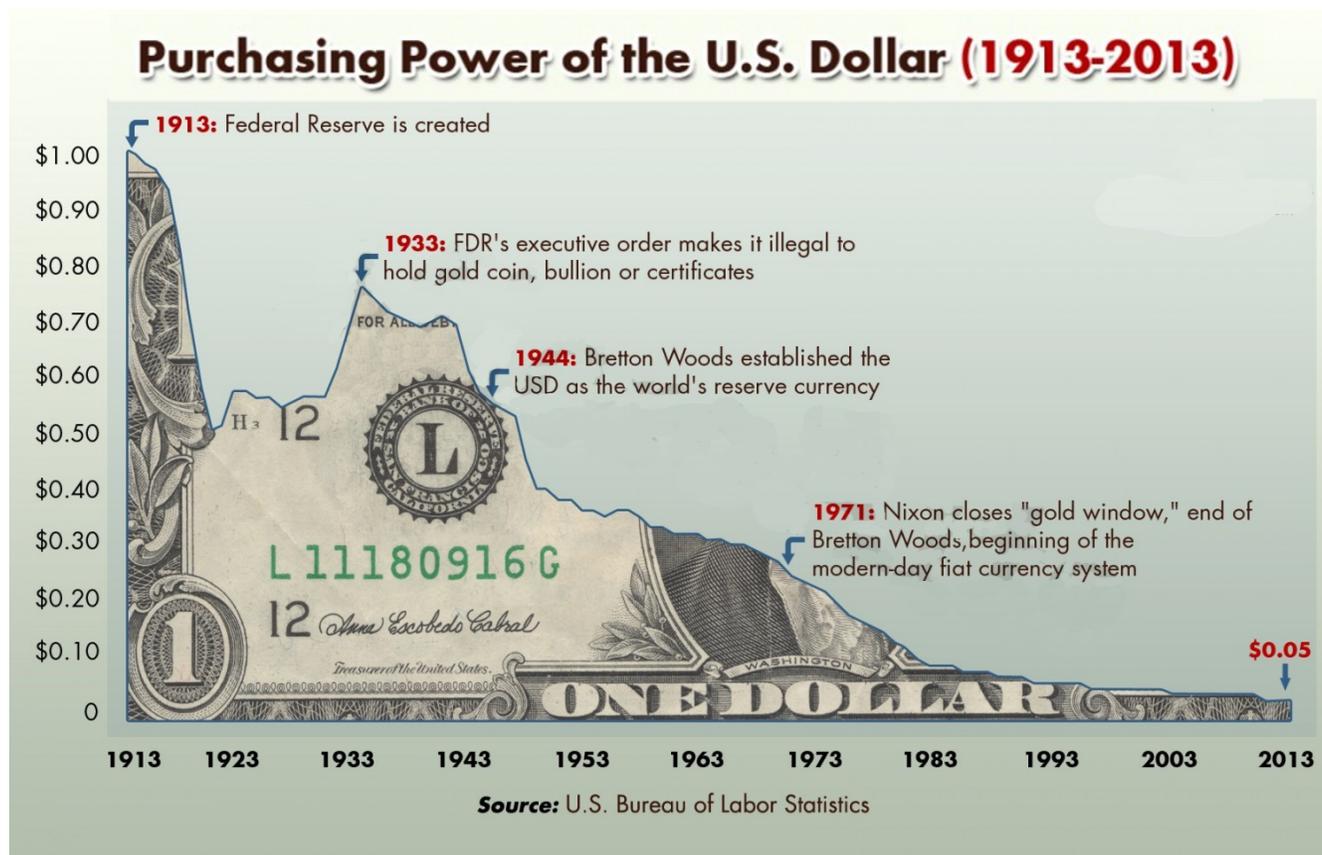

Third Century Roman inflation (and implicit currency debasement) sparked a rapid turnover of emperors as the scapegoating over the systemic debasement saw **Romans turned on Christians** with a great violence which lasted throughout the period of the currency debasement but peaked with Diocletian's edict of 303 AD. The edict decreed, among other things, that Christian meeting places be destroyed, Christians holding office be stripped of that office, Christian freedmen be made slaves once more and all scriptures be destroyed.

Europe's medieval inflation periods coincided with **witchcraft trials**. And, in the grip of hyperinflation, **Germany turned viciously on its Jews**.

Source: [ZeroHedge – From Currency Debasement To Social Collapse](#)

Look at the US Dollar Devaluation – It is Just like the Roman Denarius – But in Half the Time!

Note that this chart shows the year 2000 debasement level at approximately \$0.07. Earlier we showed how the US dollar had lost 80% from then until 2019! And for the first eight months of 2019 the dollar has lost anywhere between 15% compared with gold, and 99% compared with Bitcoin!

The US dollar is falling at an ever increasing rate – and will continue to do so – until it hits bottom!

The United States, like Rome, is the dominant world power and the world's central banks hold 60% of their international funds in dollars. The world needs dollars to buy oil since Saudi Arabia only sells it in US dollars. See: [ZeroHedge – The Fascinating Story Of How The Petrodollar Was Born And Lived In Secrecy For Over 40 Years](#)

With all the countries of the world now using fiat based systems, where their currency is backed by nothing, the US dollar remains one of the strongest of the bunch. A paradox will unfold where the weaker nations will flock to the US dollar in order to preserve their wealth, even though it is being devalued at an exponential rate. The US dollar will get stronger and stronger – until the point it crashes (Not everyone will buy the ruse)!

Who Will Get The Blame This Time?

Apparently, every time a currency collapses – someone gets the blame! And when a major currency collapses – many people die! And for at least two times historically, it has been Christians and Jews!

The Deagel report, a CIA front for information on US military equipment and civil aviation, also has data on the world's countries. Each nation has a 2025 Forecast, which for the USA and some other western nations, is suspiciously predicting a very ominous future. **Do they know a collapse, and subsequent extermination, will occur within the next five years?**

		Rank	%	World Figures

In 2012, Shane Warren had an Open Vision of the Dollar Becoming Worthless:

In the vision I was sitting on the couch watching television. . . There was a weather broadcast that was on television, and there was news anchor who said “The most amazing thing is going on right now – its tragic its tragic!” and they were building this news broadcast around this event, he said “Normally hurricanes hit on the coastlines – but there is a hurricane that seems to be coming across the heartland of America.” At that point he showed a satellite image of America, and I was horrified as I watched a storm covering from the Northern border to the Southern border – from East to West – as this massive storm with the eye right over the center of America – a hurricane coming across the center of America.

The anchor said “We have somebody on the ground in the eye of the storm, we’re going to go to him now.” They pitched it to a news reporter who was as you would see in a hurricane, the wind was blowing violently and they were being tossed to and fro. He said “This is the most amazing thing, I don’t understand it! This is not a natural storm. This isn’t normal. Look at what it is raining!” He reached down on the ground and he picked up and was holding in his hand a fist of one dollar bills. He said “This isn’t natural, its raining dollar bills!” And the anchor and this correspondent went back and forth about the meaning of the dollar bills. He said “I don’t understand it, its almost like they’re worthless, they’re worthless!

About that time it came back to the anchor. He said “Ladies and gentlemen, another tragedy has hit America. Right in the heartland of America, on the New Madrid fault, a major earthquake has just hit.” Immediately, pictures of devastation began to pop up all over America – the heartland of America, along the New Madrid fault, as earthquakes caused entire cities to crumble.

And while I was setting there, I heard a booming voice behind my ear that said “They have divided my land – now I will divide their land!” I knew immediately in my vision that He was speaking about Israel, and specifically Jerusalem.

I saw the incredible changes in the price of currency. I saw silver, not gold, but I saw silver begin to drastically increase in value. Not gold, but silver. I saw riots began to break out. Major cities all over America broke out in riots. People were rioting in the streets, and on the sign is “GIVE US OUR ENTITLEMENTS.” It looked like civil war, but it was all over the issue of the devaluing of money.

Then immediately, I was caught up in a room with world leaders. I can tell you that China was there, Iran was there. Russia was there, and here’s what is amazing, **Putin was there. In this meeting, these world leaders were talking about how to devalue the currency of America by buying oil with another currency.**

Churches became cities of refuge. The body of Christ stood up like a mighty sleeping giant in the earth and began to minister. And I saw people coming to them and I saw signs and wonders and miracles being poured out all over America. As the world couldn’t go to the government anymore, they had to come back to the Church for help.

I saw cities of refuge. Entire cities became cities of refuge. Where the scripture talks about there was rain in one city and no rain in another city – I saw that! People were plunging into these cities because there was Life there, there was Glory, the Presence of God was there, there was Peace there. And they were running to that. And revival was taking place.
